WORK EXPERIENCE

SOFTWARE DEVELOPER
FOOGLE TECH SOFTWARE   June 2023 – Present

- Designed and developed custom ERP modules using Python and MySQL to meet client-specific needs.
- Worked closely with cross-functional teams to plan, develop, and deploy scalable software solutions, which made the development process smoother and faster.
- Focused on creating user-friendly interfaces using HTML/CSS, leading to better user interaction.
- Regular debugged code and optimized performance, reducing the frequency system downtime.
- Managed client data with MySQL, writing optimized queries and performing data clean-ups to keep the system accurately
- Cooperated with senior developers to test and debug issues before deployment, contributing to faster release cycles
- Took initiative to refactor old code, improving performance and making the system easier to maintain for future updates.

TECHNICAL SUPPORT ASSISTANT   June 2018 – May 2020
WEETECH SOLUTION

- Assisted the development team with front-end editing tasks, including minor updates and fixes in HTML and CSS.
- Organized project documentation and internal reports, which helped the team stay on track and meet deadlines more consistently.
- Communicated with clients to gather their requirements, address feedback, and schedule updates, ensuring that they were satisfied with the progress.
- Helped identify bugs during the testing phase and worked with the QA team to resolve them before the final release.
- Created internal presentations to support project planning and team discussions.
- Managed task tracking tools to keep projects on schedule and ensure that everyone was aware of their responsibilities.
- Took initiative in learning new tools and processes, contributing positively to the overall team workflow.

PROJECTS

Online Event Management System

- Developed a streamlined online entry booking system, automating manual tasks and reducing event management time by 30%.
- Handled backend development, database integration, and user authentication, delivering a fully functional application.
- Conducted comprehensive testing and debugging to ensure system reliability and optimal performance.
- Collaborated on feature planning and implementation, focusing on usability and project success.
